

Stop Work Policy

The protection of health and safety at work has always been a priority for ClarineT.

Any accident is a failure for the Company and its stakeholders.

The Company is committed to conducting its business responsibly by promoting and consolidating the culture of health and safety, increasing awareness of risks and promoting responsible behavior to ensure that **work is carried out in quality and without accidents.**

Prevention is essential!

Each person who works for us or with us represents the most precious asset to be protected, therefore we ask everyone to intervene and stop any activity that could jeopardize their own health and safety or that of others with whom they interact.

The Stop Work order must be applied in good faith!

No fault or responsibility can be attributed to an employee, collaborator, contractor or supplier who reports a situation at risk or applies the Stop Work Policy, even if such action subsequently proved unnecessary.

We also ask you to promptly report any unsafe behavior and any action, omission or situation that could potentially lead to injury to your direct supervisor or the client's representative on site. Maintaining a diligent attitude and conduct is of vital importance, because **Health and Safety come first.**

We trust in your support, essential to avoid accidents.
